

*'We produce quality, because we care'
'We also recycle, because we care even more'*

DRETM

Dev Rubber Factory Pvt. Ltd.
Manufacturers and Exporters of
Butyl Tubes of all sizes • Butyl Reclaim
Natural Reclaim • EPDM Reclaim

We manufacture- Butyl Tubes, Butyl Reclaim, Natural Reclaim and EPDM Reclaim

Introduction

Dev Rubber Factory Pvt. Ltd. (An ISO 9001:2008 certified company) was founded in the year 2009 and started production of Butyl Tubes in December 2010. In a very short period, Dev Rubber Factory Pvt. Ltd. has carved a name for itself in the Butyl tube market with its complete range of Butyl tubes offered for replacement and OEM market. We have nationwide distribution network to make our product available in all markets.

In the year 2012, Dev Rubber Factory Pvt. Ltd. started production of Butyl / Natural and EPDM Reclaim of superior quality at its state-of-the-art plant at Bijnor, UP. It is the most modern plant with latest machinery and experienced technical personnel to produce approx. 10000MT of superior quality butyl and other reclaim annually. With our huge order book, we are proud of the trust our customers have reposed in us. We are already supplying our butyl and natural reclaim to the leading names in the industry in India and Abroad.

Technology & Production capacity

Dev Rubber Factory Pvt. Ltd. has installed most modern state-of-the-art plant and machinery and employed experienced professionals to produce international quality Butyl tubes and Butyl / Natural and EPDM reclaim. We have K4 Intermix (84 Ltr) to produce 22MT of Rubber compound/day. We have installed capacity to produce 25000 Butyl tubes/day of all sizes including Scooter/Motorcycle/3Wheeler/Car Radial/LCV/HCV, Farm/ADV and OTR.

Our autoclave, pre-refiners, strainers and refiners are supplied by reputed manufacturers that enable us to produce best quality reclaim. Our current production capacity of 10000MT/annum is testimony of strong demand for our products. Our technical expertise enables us to produce superior quality Butyl and Natural reclaim as per specifications demanded by our customers. We have also branched out to producing EPDM reclaim as required by few customers.

Product use & Specifications

Butyl tubes are fitted in pneumatic tyres that are used in automotive vehicles. Our butyl tubes are ISI certified and are available in all sizes. Butyl reclaim is primarily used in production of butyl automotive tubes, Tyre inner liners and in different proportions used in host of rubber products such as hoses, cables etc. Natural reclaim is used to manufacture natural rubber tubes, tyres, tread and other host of rubber products. EPDM reclaim is used by many rubber industries that manufacture rubber profiles and other rubber components.

We manufacture Butyl reclaim that has high tensile strength and low ash content as specified by our esteemed customers. We follow strict quality control and best industry standards and adhere to specifications such as IS and ASTM to produce superior quality reclaim that enables our customers to produce higher quality products with reduced costs. The use of our reclaim renders production process more cost effective thereby increasing the utility of end products.

Reclaim rubber is very useful to rubber industry as it helps in faster mixing, improved extrusion, reducing costs, reducing carbon footprints and all the while saving precious natural resources that are saved whenever we recycle, while keeping the quality of products at higher levels.

Butyl tubes are produced from rubber compound that is a mix of many chemicals including Butyl (a petrochemical derivative), Butyl reclaim, EPDM. Butyl reclaim is produced from discarded/scrap butyl automotive tubes, Natural reclaim from discarded rubber tread/scrap natural rubber tubes and EPDM reclaim from discarded rubber profiles and other EPDM waste, the use of which is also healthier for the environment as this non decomposable waste otherwise finds way to dump sites or is used for burning which releases a host of harmful chemical and fumes in the atmosphere.

Quality & Research & Development

Dev Rubber Factory Pvt. Ltd. Is an ISO 9001:2008 certified company, and we strictly follow the management practices that are defined under the certification. Our Butyl tube range is ISI certified by Bureau of Indian Standards (BIS) and the products are manufactured under strict quality control.

At Dev Rubber Factory Pvt. Ltd., we have always believed in producing quality goods at reasonable price. Quality is an uncompromising standard for us. Proper checks and balances are in place to ensure that right raw material is used, best production practices are followed and qualified technical persons are employed to produce the right product.

We have fully equipped laboratory with high quality precision equipments to ensure that only the right raw materials go into production. Our butyl tubes are continuously evaluated at every production stage to maintain High Tensile strength and elongation and other required physical properties. High tensile strength and low ash content are pre-requisite to produce superior quality reclaim. Therefore, at every necessary step, checks are made to ensure that all is going as planned and production quality is never compromised at any stage. Our qualified technical personnel are in continuous R&D mode to make quality of our butyl tubes and reclaim ever superior to our counterparts elsewhere.

Market

In just a short span of time, we have demonstrated our ability to produce and export superior quality butyl tubes at competing price. We have established elaborate distribution network all over India so that our products are available in every corner of the country. We are also OEM suppliers of butyl tubes to Birla Tyres. There is very healthy demand for our butyl /natural and EPDM reclaim on back of which we are manufacturing 10000MT/annum of superior quality reclaim. This is testimony of the trust our customers have reposed in us, which has enabled us to register impressive growth within a very short period. Apart from our current high value Indian clientele, we have also expanded our horizon to export our products worldwide.

Aim

Having written about what we do, we, at Dev Rubber Factory Pvt. Ltd., aim to be recognized as a leading producer of superior quality Butyl tubes and Butyl/ Natural and EPDM reclaim, and be recognized as a quality producer for all these products, and by recycling, we do our little bit in ensuring that this planet is little better and safer place to live in so that our future generations can appreciate the grandeur of this beautiful place called our mother EARTH.
